Professional Summary

Full Stack Developer with experience building scalable web applications using React.js, Node.js, Express.js, MongoDB, and FastAPI, including AI-powered systems, real-time features, and production-ready APIs. Active open-source contributor with hands-on experience in debugging production issues, fixing CI/CD pipelines, and collaborating on large codebases.

Technical Skills

Languages: JavaScript, Python, C++

Frontend: React.js, HTML, CSS, Tailwind CSS

Backend: Node.js, Express.js, FastAPI

Databases: MongoDB, MySQL, SQLite

Tools: Git, GitHub, Postman, VS Code

DevOps: CI/CD (GitHub Actions), Vercel, Render

Core Concepts: OOP, DBMS, REST APIs

Education

COER University

2024 – 2028

Bachelor of Technology in Computer Science and Engineering | CGPA: 9.4/10

Sai International Senior Secondary Public School, Bijnor

2023 – 2024

Senior Secondary (Class XII, CBSE – PCM) | 84.6%

G.N.G. Senior Secondary School, Yamunanagar

2021 – 2022

Secondary School (Class X, HBSE) | 92.8%

Projects

Buildora AI – AI Website Builder (SaaS) | Github

Live

- Built a full-stack AI-powered SaaS platform (MERN) enabling users to generate, edit, and deploy websites using LLM APIs (OpenRouter)
- Implemented secure authentication (JWT + Firebase OAuth), Razorpay payment integration, and scalable REST APIs using MongoDB and Express.js
- Developed dynamic website preview and deployment features, and deployed the application using Vercel, Render, and MongoDB Atlas

VoteWise AI – AI Voting Assistant | Github

Live

- Built AI-powered assistant using Google Gemini API for personalized voting guidance
- Developed responsive UI with React, Tailwind CSS, and Framer Motion
- Created secure backend APIs using Node.js and Express.js

Edu-Circle – Collaborative Learning Platform | Github

- Developed MERN + Flask-based platform with real-time group chat and collaboration features
- Designed REST APIs for groups, notes, and file sharing with structured database models
- Implemented backend using Flask and SQLAlchemy with relational data handling

Open Source Experience

Open Source Contributor – NSOC'26 & GSSOC'26 (Ongoing)

- Contributed to **13+ merged pull requests across multiple repositories** during the ongoing 45-day NSOC'26 program
- Worked extensively on the FlowForge project, implementing real-time chat features, Socket.IO integrations, drag-and-drop Kanban workflows, emoji reactions, voice messaging, unread message indicators, and UI consistency improvements
- Collaborated on production-level codebases using Git workflows, pull request reviews, debugging, feature development, and CI/CD pipeline fixes

Achievements & Certifications

Rank 5 – NSOC × ExtensionShield Hackathon

Selected Contributor – GSSOC 2026

Participated in PromptWars (Hack2Skill × GDG)

Open Source Simulation Program – BYAMN (Git & GitHub Workflows)
